

# Prepare your Students for Immunization Day!

Do your students have questions about vaccines?

Do your students have needle fears?

**Kids Boost Immunity is here to help you!**

Kids Boost Immunity (KBI) is a FREE online platform for teachers to engage digital-age students.

Sign up at [KidsBoostImmunity.com](https://KidsBoostImmunity.com) to access a free lesson and quiz designed to help prepare your students for immunization day.

It is important to do the lesson and quiz before immunization day - the best time is when the consent forms go home.

## Kids Helping Kids

KBI inspires students because they are able to help children in other countries.

### EVERYONE WINS!

#### TEACHERS WIN:

KBI is a free resource that teaches students about the vaccines they get at school and strategies to cope with needle fears.

#### STUDENTS WIN:

KBI helps students understand why vaccines are important and how to cope with anxiety around shots. Also, by doing the lesson and passing the quiz, students earn vaccines for children in other countries.

#### KIDS AROUND THE WORLD WIN:

KBI donates lifesaving vaccines to children in other countries through UNICEF.

Public Health  
Agency of Canada

Agence de la santé  
publique du Canada

BC Centre for Disease Control  
An agency of the Provincial Health Services Authority

Kids Boost Immunity is a national education and advocacy initiative administered through the Public Health Association of British Columbia, with financial support from the BC Ministry of Health and the Public Health Agency of Canada. The program is coordinated through the British Columbia Centre for Disease Control.

Kids Boost Immunity relies on other funders and partners to help purchase UNICEF vaccines earned by students.
